3 Student Map and 1 Teacher Maps Combo Contents

- 1 Teacher Maps
- 3 Student Maps

Caution!

Please only use **dry erase markers or highlighters** when marking the sequence. Do not use wet erase markers as they can be hard to remove. If a mark is difficult to wipe away or leaves a stain, **GOO GONE** can be used to remove it. Do not over apply the **GOO GONE** along the edges because it can seep underneath the laminate, causing the laminate to separate from the paper. Highlighted or marked areas on the map should be wiped off as soon as possible after completing the activity.

Note: Permanent markers will leave permanent marks. Please do not use them.
